## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement(s) (IDS) submitted on 31 March, 16 April, and 13 May 2009 is/are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Claim Status***

Claims 1 and 21-36 are active in the case. Claims 2-20 have been cancelled by preliminary amendment. Claims 1 and 21-36 are under examination; no claims are withdrawn as drawn to a non-elected invention.

Any rejection not restated in the instant office action is withdrawn in view of the response filed 31 March 2009 which cancelled all claims except for claim 1 and amended claim 1 to recite that the substrate contains fibers, a limitation which overcomes the art applied to claim 1.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1657

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 21-36 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 9, 10 of copending Application No. 11/513,500. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications recite methods of detecting fungi comprising contacting a surface with a detector and observing color changes when microbes are present; the instant case recites fibers and the '500 case recites wipes..

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1 and 21-36 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2, 6, 11-20 of U.S. Patent No. 7,282,349.

Although the conflicting claims are not identical, they are not patentably distinct from each other because all claims recite products, including wipes and tissue, which comprise a dye that reacts in the presence of bacteria and provides a visual change for recognition of bacterial contamination. Both claim sets have fibers, an art accepted distinction has not been made between "nonwoven web material" and the general fibers of the instant case,

Claims 1, 21-36 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 9 of U.S. Patent No. 7,399,608. Although the conflicting claims are not identical, they are not patentably distinct from each other because all claims recite products, including wipes and tissue, which comprise a dye that reacts in the presence of bacteria and provides a visual change for recognition of bacterial contamination; the instant case recites fibers and the '608 case recites wipes and tissues.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
